**Recycled:** Made from materials that have been processed and reused instead of discarded.

**Recyclable:** Can be collected, processed, and turned into new products instead of becoming waste.

**Renewable:** Comes from natural sources that can replenish over time such as sustainably harvested wood.

Transparency is key for HAGS. Our materials come from various suppliers, therefore the Recycled, Recyclable, and Renewable percentages are shown as the maximum possible values used in the materials. As we source more sustainable materials, these numbers will change.
