

Display board with 4 mm thick steel sheet C-profile supporting structure with 6 mm thick base plate and 3 mm thick sheet metal infill panels mechanically fixed to the structure. The display surface, 700x1000 mm in size, can be protected by two 8 mm thick compact polycarbonate sheets fixed with special stainless steel discs, or closed in a non-hermetic manner by two 8 mm thick tempered glass doors fitted with locks and supported by specially designed stainless steel hinges. Available in corten steel, brushed stainless steel or coated steel. It is possible to customise the sides of the structure by laser cutting.

It is possible to customise the sides of the structure by laser cutting.

All fixings are in AISI304 stainless steel.

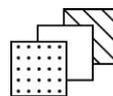

Prepared with holes Ø 12 mm for ground fixing with mechanical dowels (not included).
