

Display board consisting of a pair of tubular steel 30x100x2 mm supports with a 7 mm thick steel sheet base plate, connected by two M12 threaded steel bar tie-rods, and a double-sided panel consisting of two 2 mm thick folded and welded steel sheets, also coated with a smooth finish to allow for the application of posters or adhesive supports. The ends of the supports and the holes on them are closed by PVC caps.

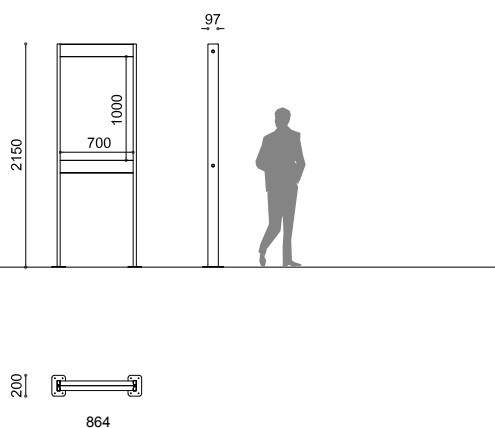

The planned display format is (base x height) 700x1000 mm.

All metal parts are galvanised and coated with thermosetting polyester powder.

All fixings are in AISI304 stainless steel.

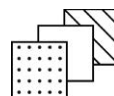

Prepared with holes Ø 12 mm for ground fixing with mechanical dowels (not included).
