

CLEAN 150 - WPC

CLEAN 300 - WPC

Waste bin-cover consists of two trapezoidal gantries made of 30x30x2 mm square steel tubing filled on the inside with 1.5 mm thick folded steel sheets. The bin cover is fitted with a sloping cover that prevents the depositing of waste in 1.5 mm thick steel sheet and a back also in 1.5 mm thick folded steel sheet, on which 7 horizontal WPC plus slats are fixed, to slide horizontally to the locks at the sides.

The doors are locked by means of a snap lock with a supplied triangular key or a cylinder lock with an encrypted key.

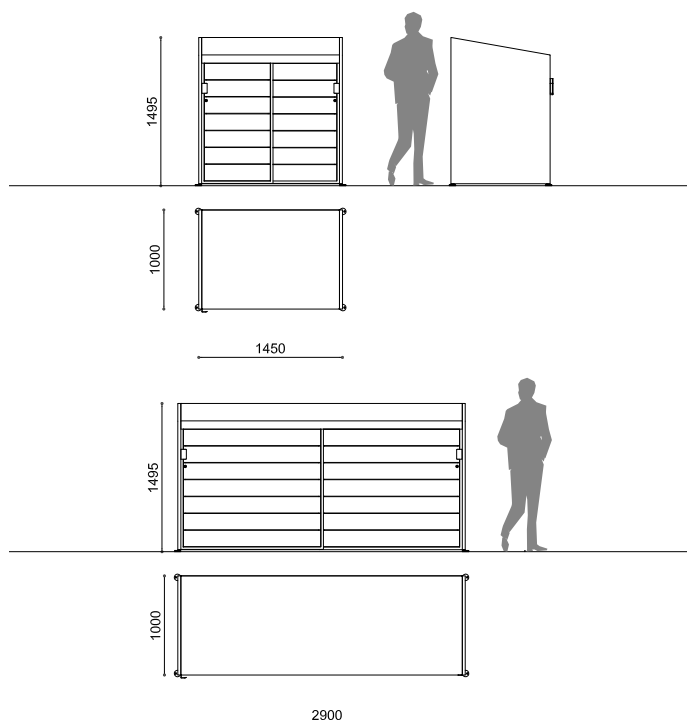

The CLEAN 150 version can hold up to 2 x 120 litre bins or 2 x 240 litre bins, while the CLEAN 300 version can hold up to 5 x 120 litre bins or 4 x 240 litre bins.

All metal parts are galvanised and coated with thermosetting polyester powder.

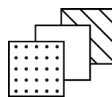

All fixings are in AISI304 stainless steel.

Free standing with M10 adjustable feet for levelling prepared with Ø 11 mm hole for mechanical mechanical dowels (not included).
