

Modular litter bin with support pole made of extruded aluminium with an elliptical cross-section 150x100 mm with internal tubing diameter Ø 50 mm in the flanged version with concealed plate. The pole is finished at the top with a shaped cast aluminium cap. The 4 containers are made of 15/10 mm thick shaped and curved sheet steel. In the differentiated waste collection version, the 4 containers (2+2) give the litter bin the shape of petals and as a whole that of a flower. Each bin is fitted with a 20/10 mm thick laser-cut sheet steel lid and internal bag stop. All fixings are in AISI304 stainless steel. Prepared with holes for ground fixing through mechanical dowels (not included) or for ingrounding.
