PARK & URBAN FURNITURE BY HAGS

The products in our Park & Urban Furniture portfolio are developed in collaboration with renowned Scandinavian designers with the aim of enhancing public areas and creating inviting outdoor living spaces.

THE IMPORTANCE OF OUTDOOR SPACES

Parks and public spaces provide significant environmental, aesthetic, and recreational advantages for everyone. We believe it is extremely important that these public spaces are welcoming to people of all ages and abilities.

Outdoor seating provides a comfortable place for people to take a break, meet others or just sit and enjoy the scenery.

A photograph of three people (two men and one woman) sitting at a table outdoors, enjoying a meal. The table is set with a white tablecloth, gold-rimmed glasses, plates, and a large wooden charcuterie board featuring strawberries, crackers, cheese, and orange slices. The background shows a grassy area with a white wooden fence and trees. The text "INSPIRING EVERYONE TO ENJOY OUTDOOR SPACES" is overlaid in large, white, distressed font.

INSPIRING EVERYONE TO ENJOY OUTDOOR SPACES

Inspiration is a feeling of excitement you get from someone or something that inspires you to come up with new and creative ideas.

All our park and urban furniture is manufactured to a high quality. No matter where the outdoor area is located, HAGS furniture is durable, aesthetically pleasing and can be individually assembled according to needs. Our modular park furniture series, in particular, offer countless possibilities.

SUSTAINABILITY

5 in focus!

HAGS & Sustainability

At HAGS, we work systematically and continuously to reduce the environmental impact of the company and our products from a life cycle perspective.

We continuously strive to optimize logistics and transportation, areas within our control that significantly impact environmental sustainability. By doing so, we aim to minimize our carbon footprint and enhance the efficiency of our operations.

A fundamental pillar of our sustainability approach is collaboration. We engage in close cooperation with our suppliers, as well as with our customers and partners. This collaborative effort allows us to enhance our understanding of one another's needs, requirements, and expectations.

To ensure sustainable practices, we closely monitor our suppliers' material selection and production methods. Leveraging the power of product development, we exercise control and influence over the entire process. This enables us to make informed decisions regarding materials, manufacturing techniques, and packaging, with sustainability at the forefront.

In our work we adhere to the United Nations Universal Declaration of Human Rights, the UN Convention on the Rights of the Child, the UN Declaration against Corruption and the eight core conventions of the ILO.

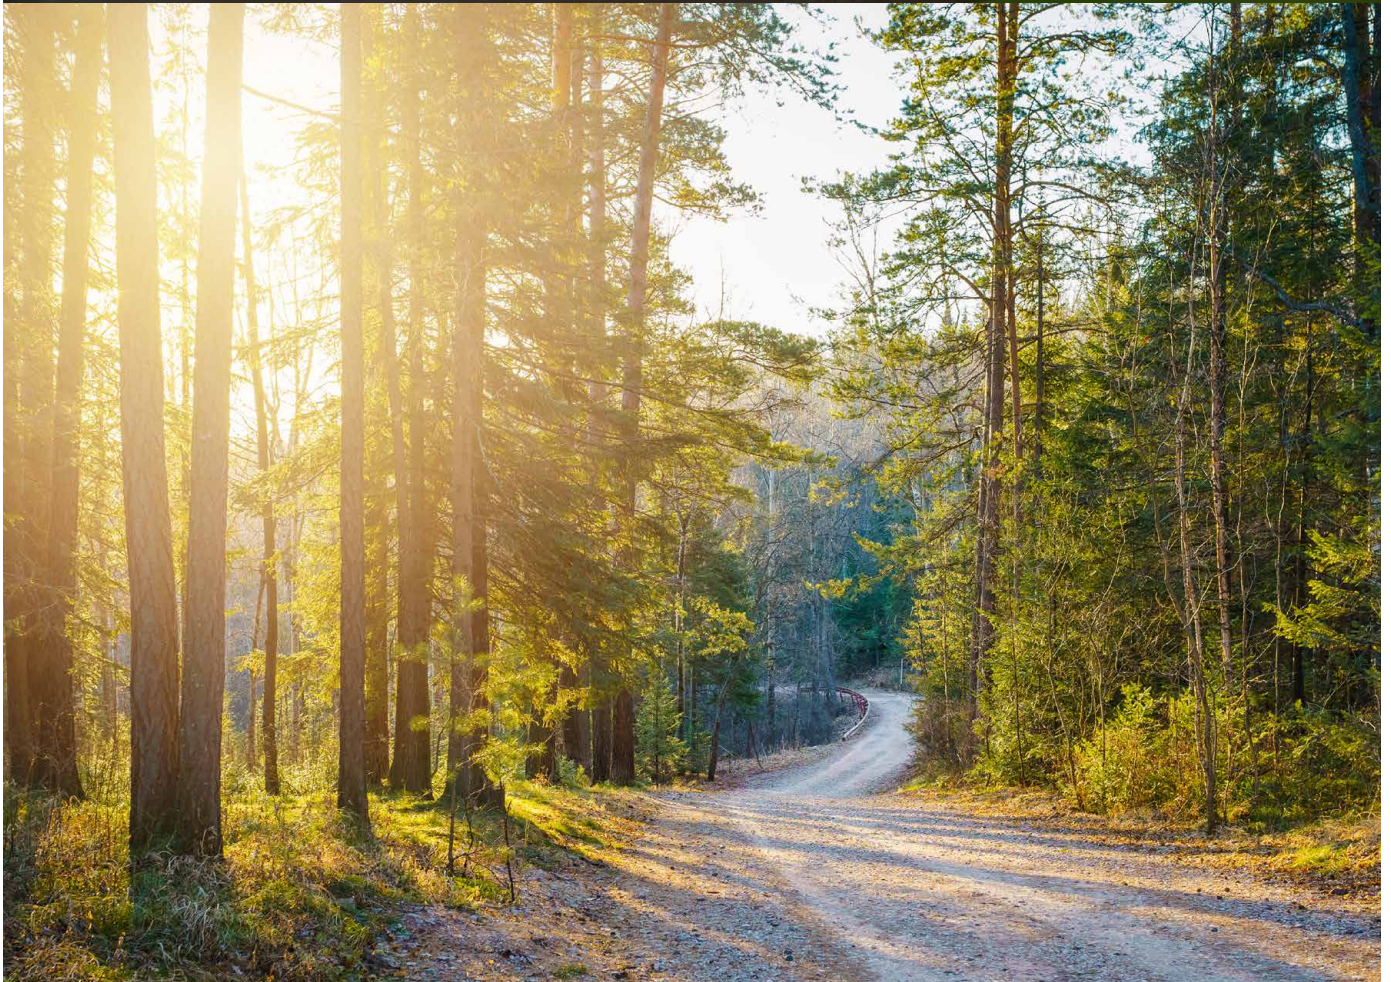

Our aspiration is to collaborate in building the groundwork for a sustainable society, both for present and all future generations.

Product design that supports a circular economy

Our sustainability principles are based on a strong belief in integrating nature into everyday life. Our products are low maintenance and durable.

- Flexible and modular design
- Carefully selected sustainable materials
- Packaging materials that are largely made from recycled or reused materials.

SOLBERGA

The Solberga sun lounger, with its organic contours and slender lines, offers a sublime, weightless sensation.

Designed for inclusivity, it encourages social engagement outdoors and provides reliable support for the back and legs.

Available in 1 metre or 1.8 metre widths, it offers ample space for group gatherings or peaceful relaxation. It combines functionality and aesthetics for a harmonious and serene experience.

Design: Ludvig Rundlöf

ROSENLUND

Rosenlund is a flexible, modular system for creating an attractive interior and exterior communal spaces.

Combine products and colours that match your environment. Park benches, benches and tables, creative trellises and planters that convert into benches, bike racks for the active city and litter bins - there are a multitude of ways to create a colourful gathering place.

The armrests and seat height are designed so that the benches can be used by everyone, regardless of age and ability.

The system allows you to design an area entirely according to your wishes.

MATERIALS AND SURFACES

Main Material:

Slow-growing Nordic pine (FSC-certified), 143 x 45 mm and 65 x 45 mm.

Oiled, glazed and coated with matt lacquer.

Standard colour: Cream white

Alternative Materials: FSC hardwood, oiled (on request).

Frame:

Galvanised, lead-free primed and powder-coated or hot-dip galvanised flat steel 10 mm or 2 mm (litter bins/planters)

Standard colour: red, green, blue, dark grey or galvanised

Other colours available on request.

Rosenlund Modular System - Planters & Informal Seating Groups

These elegant and stylish planters look stunning both outdoors and indoors.

Their simple design helps to draw attention to and highlight the natural beauty of the plants. We offer a range of shapes, colours and sizes to suit your environment. With compatible modules, they can also be transformed into seating and can be attached to Rosenlund benches and narrow tables. A raised module can be added to the planters to adjust the height.

Modules

1. Trellis

Quick and easy to install, this slender trellis provides support for your plants and creates a wonderful eye-catcher. With several trellises, the system is suitable as a partition to divide up spaces.

2. Seating

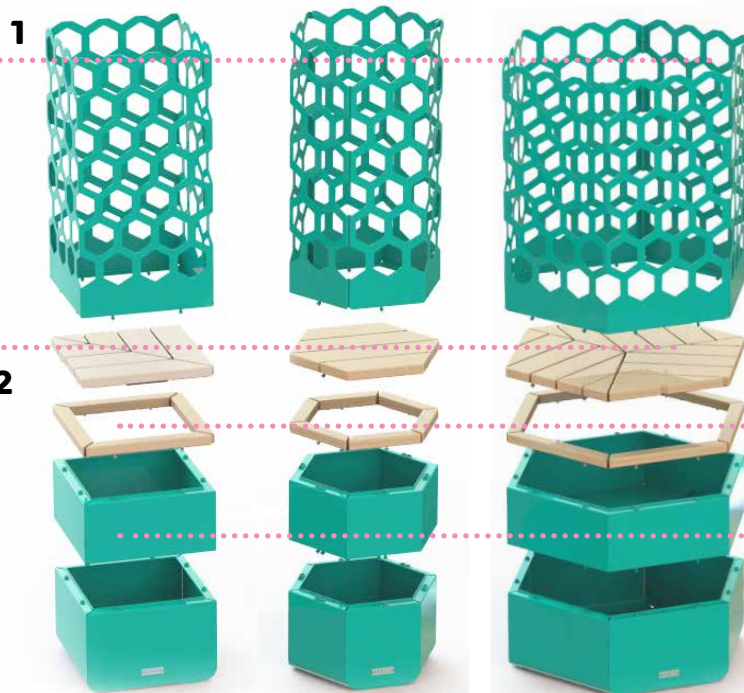

Turn your planter into a seating area by simply adding a seat. Available in different shapes and sizes to match our Rosenlund planters.

3. Wooden frame

The wooden frame adds a touch of style to your planter and loosens up the appearance. This component is essential when designing planters. Available in various shapes and sizes to match our Rosenlund planters.

4. Elevation module

This module is perfect for raising the planters and turning it into a table or a high seat. Available in different shapes, sizes and colours to match our Rosenlund planters.

SOFIERO

The Sofiero modular park furniture series offers a timeless and harmonious design. It is simple, elegant and comfortable by nature and enhances any outdoor space.

You can combine the products according to your own needs and create new wonderful meeting places.

Sofiero was developed in collaboration with renowned architect and industrial designer Jan Wickelgren and designed with comfort, style and modularity in mind. "The idea behind the design of Sofiero was to create a versatile, timeless series that gives architects and urban planners the flexibility to create vibrant and inclusive public spaces," Jan explains.

Designer: Jan Wickelgren

MATERIALS AND SURFACES

Main Material:

Slow-growing Nordic pine (FSC-certified), 28 x 68 mm.

Oiled, glazed and coated with matt lacquer.

Standard colour: Dark brown or green

Alternative Materials: FSC hardwood, oiled.

Frame:

Galvanised, lead-free primed and powder-coated or hot-dip galvanised steel tube, Ø 76 mm and flat steel, 60 x 8 mm.

Standard colour: Black or Galvanised

Other colours available on request.

EKEBY

The Ekeby series is simple but highly functional and has been carefully designed to last for many years. With its minimalist aesthetic, the series is the perfect complement to both urban and rural settings.

Available in pine, FSC hardwood, recycled plastic and HPL, the Ekeby range has a material suitable for every environment.

Armrests are also available and can be added for additional support if required.

MATERIALS AND SURFACES

Main Material:

Slow-growing Nordic pine (FSC-certified), 45 x 93 mm and 45 x 120 mm.

Oiled, glazed and coated with matt lacquer.

Standard colour: Dark brown or green

Alternative materials: FSC hardwood, oiled, recycled plastic or HPL high-pressure laminate.

Frame:

Galvanised, lead-free primed and powder-coated or hot-dip galvanised square steel, 40 x 25 mm and 80 x 40 mm.

Standard colour: Black or Galvanised

Other colours available on request.

ZETA

Zeta, a small yet highly appreciated furniture group that seamlessly complements schoolyards, rest areas, and unique urban settings. This series combines robust flat iron with beautiful wooden surfaces, creating a captivating blend of strength and character.

The sofa's base, armrests, and backrest harmoniously align, creating an alluring sense of light and space that runs consistently throughout the entire collection. Ergonomics have been meticulously attended to, ensuring exceptional comfort and enhanced mobility, even for the elderly.

The versatile Zeta series comprises a sofa, table, standing bench, and standing table. Additionally, it features bicycle bollards that offer a comprehensive and uniform outdoor environment.

BICYCLE STORAGE

Our bicycle stands and shelters are not only aesthetically pleasing with their elegant and modern design but also serve as the perfect solution for bicycle parking.

These structures provide an ideal spot for securely parking bicycles. With the integrated roof, the shelters offer effective protection from various weather conditions.

They can be seamlessly combined with our bicycle racks and effortlessly blend into any environment, thanks to their clean and sleek lines.

For enhanced security, an optional lockable gate is available, providing additional peace of mind.

HAGS bicycle shelters are available in various styles and colour combinations.

Capella

Frame and wall elements made of hot-dip galvanised square steel.

Capella Bicycle Shelter

- 8043685 S Galvanised straight metal roof
 - 8043687 S Galvanised straight plastic roof
 - 8043684 S Galvanised curved metal roof
 - 8043686 S Galvanised curved plastic roof
- ☛ 4,3 x 2,6 x 2,3

Capella Bicycle Shelter Extension

- 8043830 S Galvanised straight metal roof
 - 8043832 S Galvanised straight plastic roof
 - 8043829 S Galvanised curved metal roof
 - 8043831 S Galvanised curved plastic roof
- ☛ 4,2 x 2,6 x 2,3

Nova

Frame made of hot-dip galvanised square steel, wall elements made of hot-dip galvanised steel mesh.

Nova Bicycle Shelter

- 8043681 S Galvanised straight metal roof
 - 8043683 S Galvanised straight plastic roof
 - 8043680 S Galvanised curved metal roof
 - 8043682 S Galvanised curved plastic roof

 - 8043825 S Galvanised curved plastic roof
- ☛ 4,2 x 2,6 x 2,3

Nova Lockable Gate

- 8061917 Galvanised for straight roof
- 8064219 Galvanised for curved roof

Stella

Frame made of hot-dip galvanised square steel. Wall elements made of knotless Nordic pine, painted with linseed oil-based black-brown wood stain.

Roofs made of corrugated sheet steel or transparent plastic, either straight or slightly curved.

In addition to the above-mentioned options, the steel components are available in a variety of other colours, and the wooden components of the Stella product variant can be manufactured in other glaze colours instead of black-brown.

Roofs can also be ordered from the factory with a preparatory surface for "green" roofs. Optional extensions allow any number of shelters to be placed end to end to create a combination tailored to your space and budget.

Stella Bicycle Shelter

- 8043673 S Galvanised straight metal roof
 - 8043675 S Galvanised straight plastic roof
 - 8043672 S Galvanised curved metal roof
 - 8043674 S Galvanised curved plastic roof
- 4,3 x 2,6 x 2,3

Stella Bicycle Shelter Extension

Modern solutions for staying sheltered outdoors with the Nova shelter

Whether as an outdoor classroom, a greenhouse or a waiting area, Nova's modules offer a flexible solution for a variety of applications.

- 100% modular
- Easily relocatable
- Highly durable construction made of galvanised steel
- Polycarbonate roof and side panels
- Ventilation gaps to maximize airflow
- Simple assembly through sunken foundation anchoring (no concrete necessary)

Contact us and we will help you plan the right solution for your project!

BICYCLE RACKS

Our extensive range of bicycle racks ensures the safety of users while promoting proper bicycle storage.

The racks are available in a variety of shapes and designs, perfectly tailored to fit into any outdoor space.

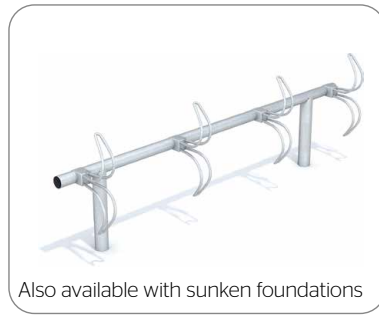

Our range encompasses freestanding and modular designs that can be seamlessly combined with our selection of shelters.

SHADE STRUCTURES

Shade systems are becoming more and more important in today's world of increasing UV levels, whether for children at play or for adults staying in one place for longer periods of time.

Our shade structures offer a robust and modern solution that can be used all year round and are adaptable to the environment and application.

Our shade structure customers come from a wide variety of areas including local councils, schools, shopping centres, hotels, airports or train stations.

Protection from sun and rain

Improved
air circulation

Blocks up to 96% of UV-
radiation

Reduction of up to 25 °C

Easy maintenance

10 year warranty

Tension Sail

4 posts / 1 fabric sail
 Min: 6 x 6 m / Max: 12 x 12 m

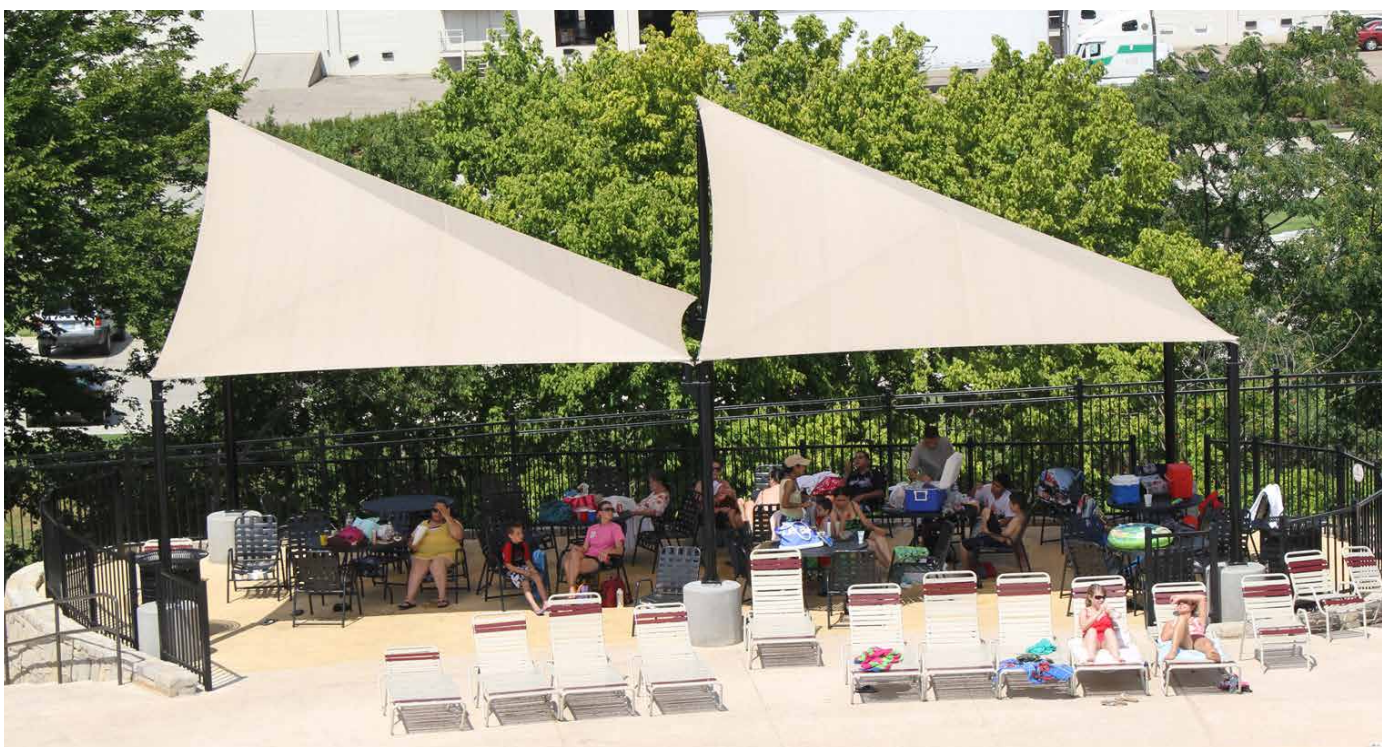

Mariner

4 posts / 1 double-layer fabric cover
 Min: 6 x 6 m / Max: 9 x 9 m

Wave

4 posts / 1 fabric cover
 Min: 6 x 6 m / Max: 76 x 76 m

Hip
4 posts / 1 fabric cover
Min: 3 x 3 m / Max: 12 x 12 m

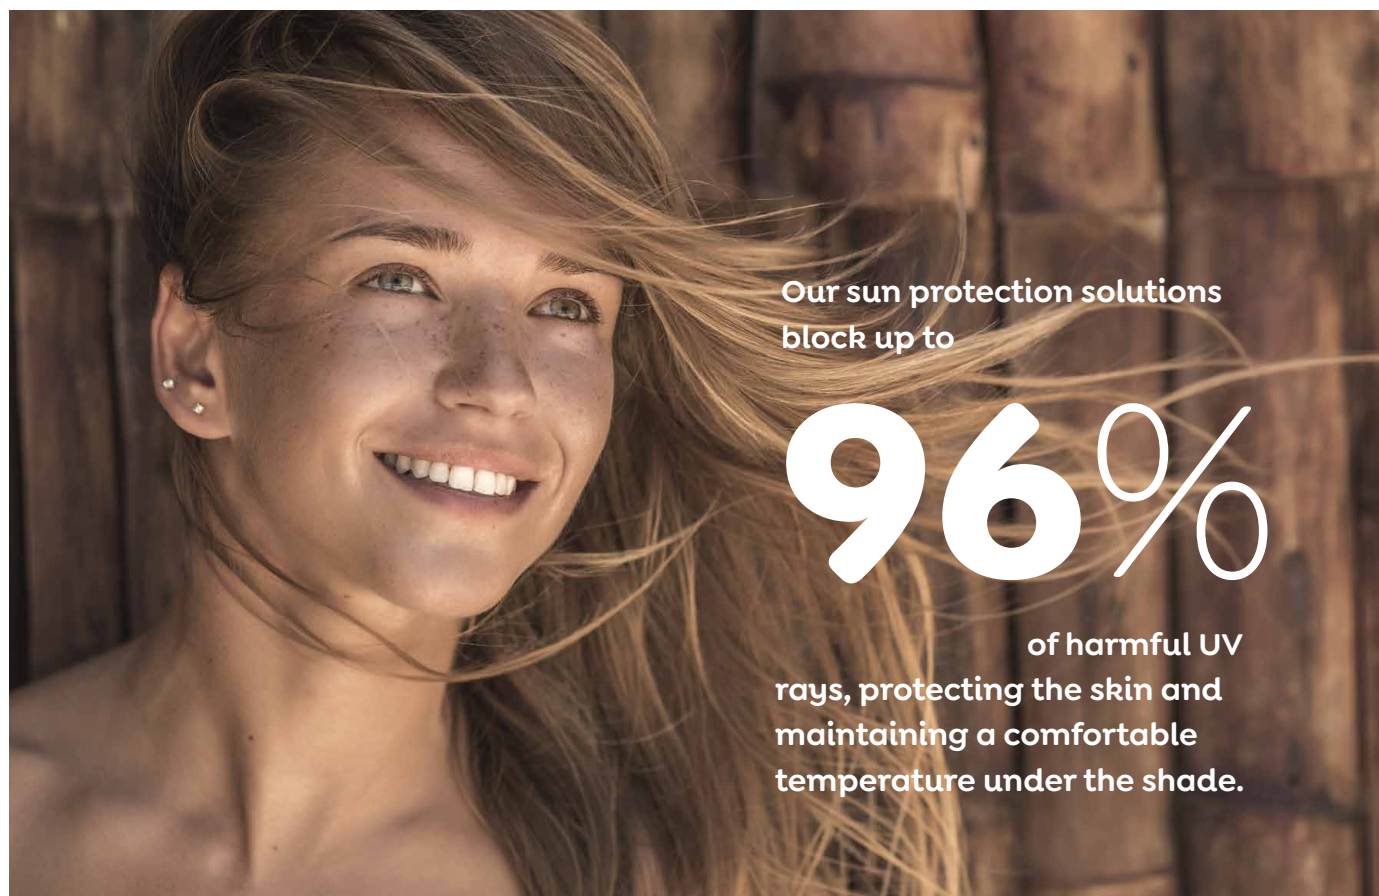

Full Cantilever

Min: 3.65 x 3.65 m / Max: 4.25 x 4.25 m

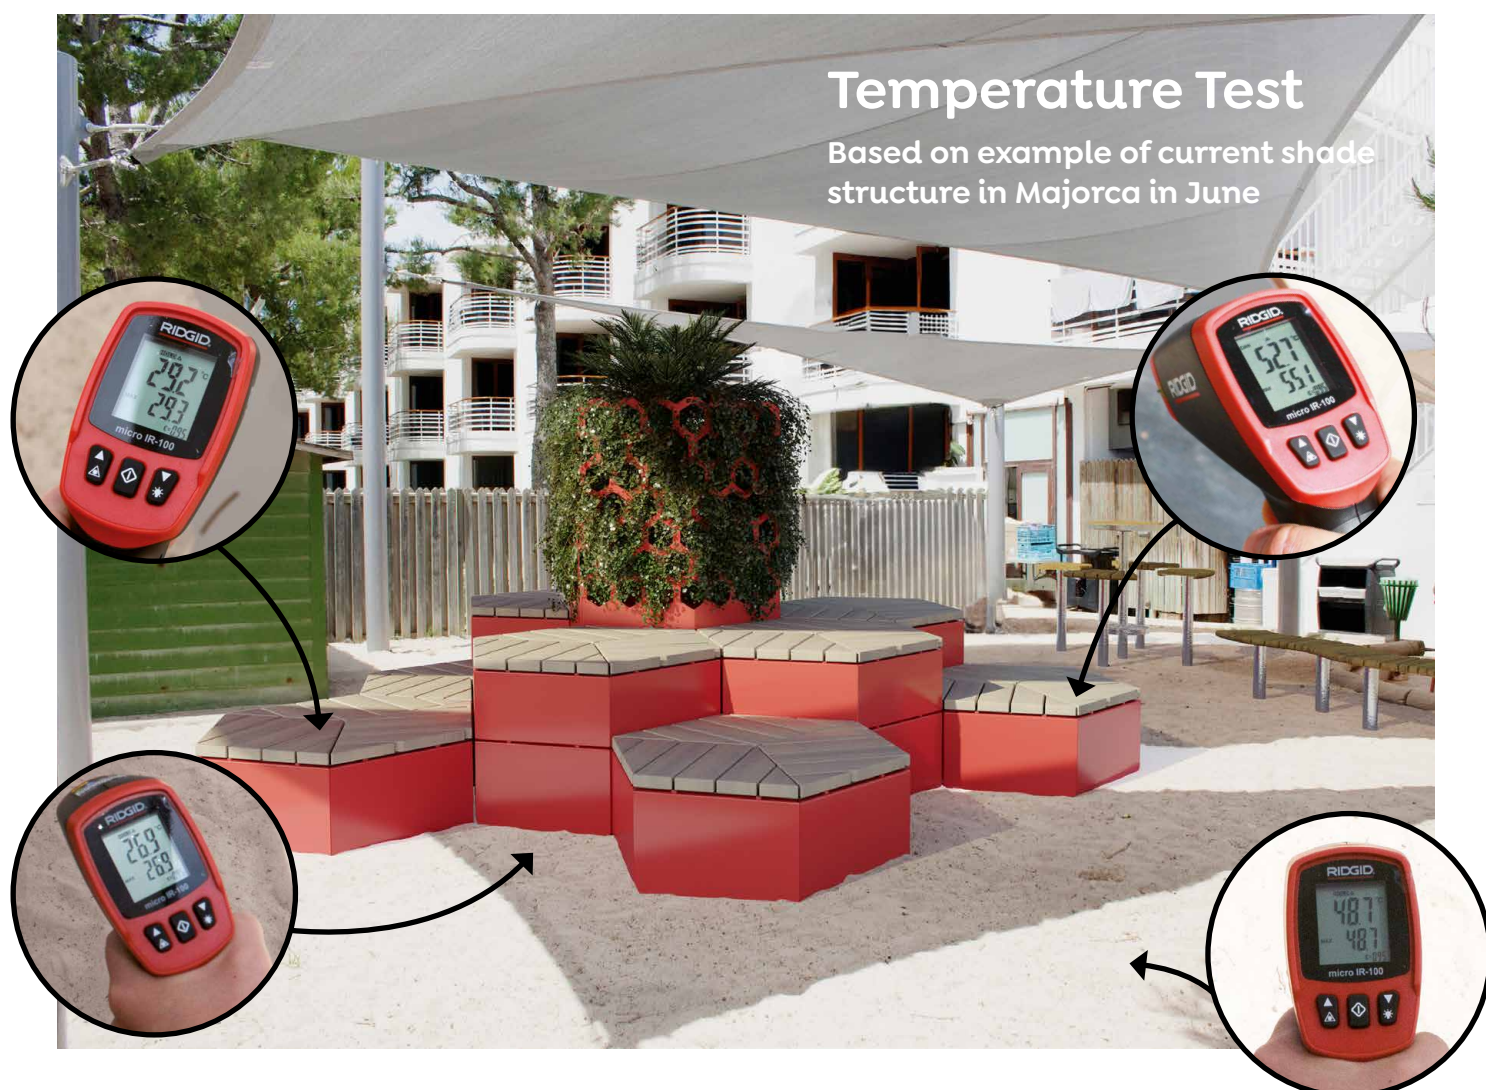

Our sun protection solutions
block up to

96%

of harmful UV
rays, protecting the skin and
maintaining a comfortable
temperature under the shade.

Temperature Test

Based on example of current shade structure in Majorca in June

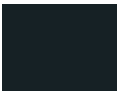

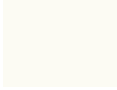

Location	Temperature (°C)
Top Left (Shade)	29.7
Top Right (Shade)	52.7
Bottom Left (Shade)	26.9
Bottom Right (Sun)	48.7

Transforms outdoor areas into UV-protected spaces.

- Micro-perforated fabric allows air to circulate in the shaded area, creating a much cooler atmosphere in this area.
- The fabrics are also made to withstand extreme winds and snow loads.
- All fabrics are covered by a 10-year manufacturer's guarantee.
- They are easy to maintain and clean. They have a service life of well over 10 years and are processed in such a way that the seams neither unravel nor tear.
- We offer a variety of different design concepts where the customer can choose the colours for both the fabric and the steel components.

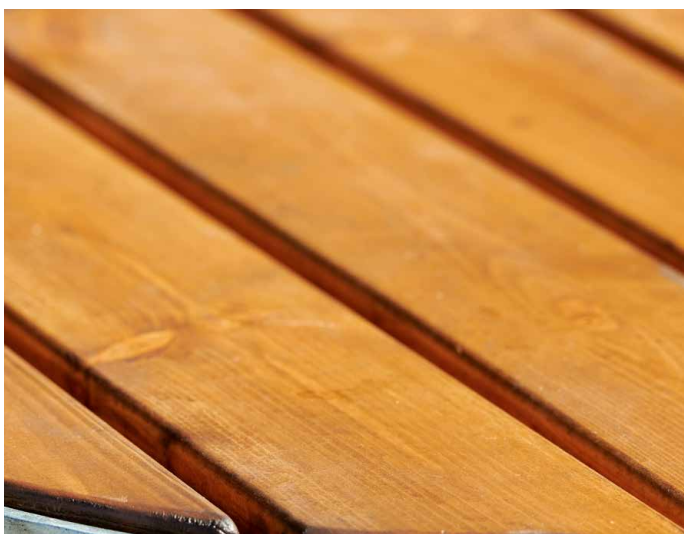

Steel Colour Options

			
Black Grey RAL7021	Chocolate Brown RAL8017	Black Green RAL6012	Cobalt Blue RAL5013
			
Pure White RAL9010	Beige RAL1001	Zinc Yellow RAL1018	Signal Grey RAL7004

The steel colours shown here in this brochure are for demonstration purposes only and are subject to the usual limitations caused by printing on paper and may therefore differ slightly in colour from the original. The fabric covers are available in a wide range of colours. We would be happy to advise you on your choice of colour. Please contact us if you require an original sample of the fabric or steel components.

COLOURS

We recognise that each environment is unique, some require colours that blend in, while others need colours to stand out and create a bold statement. On these two pages you will find our standard colours. However, if you wish to tailor your furniture to align with your environment, we've got you covered.*

Rust & Fade Resistance

Freezing temperatures in Scandinavia or the hot sun of the Mediterranean – our materials and finishes have handled it all without rusting or fading.

Impact Testing

We test new materials to breaking point, even if it means hammer blows at -20°F, to ensure strength, durability, and safety.

Weight Loading

We test each product to the appropriate EN standard to ensure it can support the weight of the user/s.

Cycle Testing

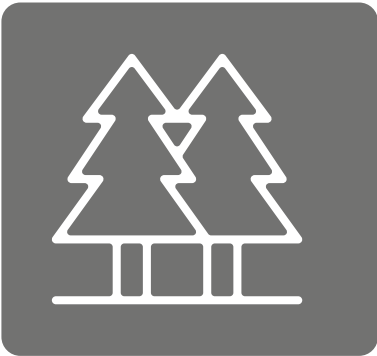

We want everyone to enjoy uninterrupted use of our furniture, therefore we consider a variety of stress tests used during cycle testing to try and push a product to its limits.

Vandalism Testing

We test all of our Park & Urban Furniture to the extreme to ensure they withstand all types of unexpected vandalism: welding torches, hammer blows, knife cuts – we test everything.

Nordic Pine

Our FSC-certified pine wood comes from Scandinavian forests where the trees grow slowly and develop a very dense and compact quality.

Steel

We only use structural steel, which is designed to withstand repeated use and heavy impact. This material undergoes a series of treatments that increase its durability and resistance.

Hardwood

All our hardwood is FSC-certified and comes from responsibly managed forests. Our wood cutting process is fully computerised and reduces waste.

Recycled Plastic

We use recycled polyethylene for our plastic park furniture.

Please note: Regular inspection and maintenance is recommended in line with HAGS Inspection and Maintenance Guides.
