

Tree grid made of 5 mm thick shaped steel sheet, with 30x30x2 mm steel tubular elements. It is available in three square and two rectangular sizes, the latter having circular holes for inserting suitable spotlights (not included) on the ground. For each version, the corresponding galvanised L-shaped steel profile counter-frame with brackets for cementing can be requested. All metal parts are galvanised and coated with thermosetting polyester powder, with the exception of the counter-frame. All fixings are in AISI304 stainless steel. Installation by cementing the counter-frame then simply positioning the grid inside.

### technical data

990x990 mm	500x500 mm	30 kg
1190x1190 mm	500x500 mm	47 kg
1440x1440 mm	750x750 mm	60 kg
990x1490 mm	480x1000 mm	41 kg
1190x1790 mm	500x1100 mm	63 kg
H 35 mm		

Galvanized and powder coated steel

Installation by cementing the counter-frame then simply positioning the grid inside

Counter-frame (necessary complement)
