

Table from 2 to 4 seats independent seats for playing chess. The base of the table and the seats is composed of a round steel tube 80x2 mm welded to a square base plate in 7 mm thick steel sheet and a 3 mm thick steel frame onto which the square seating surfaces and the square playing surface in 8 mm thick HPL are fixed. The latter is screen-printed to identify the playing area. All metal parts are galvanized and coated with thermosetting polyester powder. All fixings are in AISI304 stainless steel. Prepared with holes Ø 12 mm for ground fixing with mechanical dowels (not included).
