

Dog litter bin with bag dispenser, complete with bag dispenser. The cylindrical structure is made of 1.5 mm thick, edged sheet steel with a flat front panel equipped with a window for removing the bags (not included), which are fixed inside the structure on a special removable support. The opening lid made of 2 mm thick sheet steel is equipped with a triangular key lock and a \varnothing 120 mm flap for bag insertion. There is a round steel bag-holding ring inside the litter bin. The litter bin is offered in the version for an existing post or complete with a \varnothing 80 steel tube post with base plate or extended for cementing.

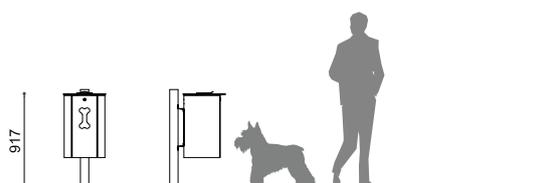

All metal parts are galvanised and coated with thermosetting polyester powder.

All fixings are in AISI304 stainless steel.

On request, the litter bin can be supplied with customised graphics for the flat front, which is always supplied with a smooth finish.

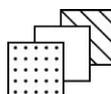

Prepared with holes \varnothing 10 mm for ground fixing with mechanical mechanical dowels (not included) or for ingrounding.
