

Litter bin, available in two sizes, with cylindrical frame made of 1.5 mm thick, edged sheet steel with flat front and opening lid made of 2 mm thick sheet steel with triangular key lock. Alternatively, there is also a version with a cylindrical structure made of hardwood strips fixed to internal steel sheet ribs. The version with integrated ashtray has a removable inner bin made of 60x60x2 tubing and a stainless steel cigarette extinguishing plate.

There is always a round steel bag-holding ring inside the litter bin.

All metal parts are galvanised and coated with thermosetting polyester powder.

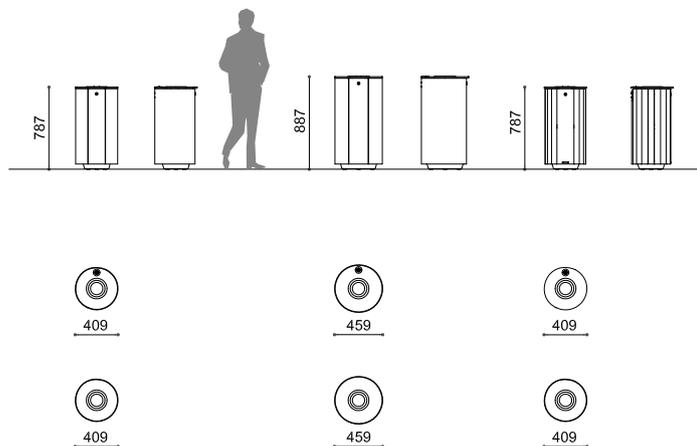

The hardwood is treated with water-based pigmented impregnation.

All fixings are in AISI304 stainless steel.

On request, the litter bin can be supplied with customised graphics for the flat front, which is always supplied with a smooth finish.

Prepared with holes Ø 11 mm for ground fixing with mechanical dowels (not included).
