

Cigarette bin consisting of an outer steel tube structure $\varnothing 102 \times 2$ mm with base plate of 6 mm thick sheet metal and the inner container of stainless steel tube $\varnothing 76 \times 2$ mm. The container has a perforated top plate with an inclined blade for collecting butts. Thanks to the opening with a triangular key lock, the container can be easily removed for emptying and cleaning. All metal parts, with the exception of the inner container, are galvanized and coated with thermosetting polyester powder. All fixings are in AISI304 stainless steel. Prepared with holes $\varnothing 12$ mm for ground fixing with mechanical dowels (not included).
