

Modular shelter available in various configurations of three, four, five modules with two different depths, consisting of a structure in HEB 140 beams with 12 mm thick steel sheet base plates, with a flat roof in 5+5 mm thick laminated tempered glass and 10 mm thick tempered glass walls, with a polished wire finish. The roof supporting structure is in 140x140x4 mm steel tube with 7 mm thick steel sheet brackets and glass support supports in 3 mm thick U-folded sheet metal. The shelter is supplied complete with an hardwood or thermo-treated pine bench and a steel frame, integrated into the lower crossbar of the structure, made of 100x100x3 mm steel tube. The bottom glass panes are fixed to the same lower cross beam and to the roof structure by means of stainless steel devices with suitable gaskets. The shelter can be equipped with a side wall of 5+5 mm thick laminated tempered glass. It is also available in an illuminated version with LED spotlights housed inside the roof supporting tube.

The shelter can be equipped with an A3 aluminium snap-in notice board (to be fixed to the glass with structural double-sided adhesive tape). All metal parts are galvanised and coated with thermosetting polyester powder. The hardwood is treated with water-based pigmented impregnation, while thermo-treated pine is supplied not impregnated (impregnation available as an option). All fixings are in AISI304 stainless steel.

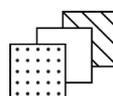

Prepared for ground fixing by means of specially dimensioned anchor plates (included) to concrete.
